Pluto Platform Lift

The 'Pluto' platform lift is specifically designed to fit into a small area. It is one of the most compact systems available, without the need to accommodate additional lift plant, ideal for private residences.

The Pluto is very economical to buy, install and run compared to most other lift systems. The self-contained enclosure can be assembled within days, minimising location disruption and costly builders work.

PLUTO PLATFORM LIFT

TECHNICAL SPECIFICATION

Lifting Capacity	250kgs
Lifting Heights	Suitable for 200mm up to 12000mm (up to 5 stops)
